the financial statements at their respective closing dates.

#### (d) Trading Account Assets and Liabilities

Transactions that seek gains on short-term fluctuations and arbitrage in interest rates, currency prices, market prices of financial instruments (trading transactions) are recognized on a trade date basis. They are recorded as trading assets or trading liabilities on the consolidated balance sheets and gains or losses on these transactions are recorded in trading income or trading expenses on the consolidated statements of income.

The Bank values securities, monetary claims, etc. held for trading purpose at the market price prevailing at the balance sheet date. Derivatives, such as futures and option transactions, are stated at the amount assuming that they were terminated or settled at the balance sheet date.

Trading income and expenses include interest income or expenses as well as changes in unrealized gains or losses on securities, monetary claims and derivative financial products during the fiscal year.

(e) Securities

Securities held to maturity are carried at amortized cost using the straight-line method with cost determined by the moving average method. Investments in non-consolidated subsidiaries not accounted for by the equity method are valued at cost determined by the moving average method. In principle, securities available for sale are carried at fair value with cost of sales determined by the moving average method. However, securities available for sale, for which it is extremely difficult to determine the fair value, are valued at cost determined by the moving average method.

The difference between the acquisition cost and the carrying amount of securities available for sale, representing unrealized gains and losses, is recognized as unrealized gains (losses) on securities available for sale, net of taxes, and included directly in net assets.

Securities held as components of individually managed money trusts whose principal objective is investments in securities are stated at fair value.

(f) Derivatives

Derivatives held or written are stated at fair value.

(g) Tangible Fixed Assets (excluding leased assets)

The Bank uses the declining-balance method for depreciation of tangible fixed assets other than buildings acquired on and after 1st April, 1998 which are depreciated by the straight-line method. The useful lives for buildings and equipment are as follows:

Buildings: 3 to 60 years

Equipment: 2 to 20 years

Tangible fixed assets of consolidated subsidiaries are depreciated mainly using the declining-balance method.

(h) Intangible Fixed Assets (excluding leased assets)

Intangible fixed assets are amortized using the straight-line method. Software for internal use is amortized based on the estimated useful life determined by the Bank and its consolidated subsidiaries (generally 5 years).

(i) Leased Assets

The tangible and intangible fixed assets capitalized under the finance lease transactions entered into on and after 1st April, 2008 where ownership of leased assets is not transferred to lessees are depreciated by the straight-line method over the lease term with their residual value of zero.

(j) Accounting for Deferred Assets

Bond issuance costs are expensed as incurred.

#### (k) Reserve for Possible Loan Losses

For loans to insolvent customers who are undergoing bankruptcy or special liquidation, etc. (hereinafter, "borrowers under bankruptcy proceedings") or who are in a similar financial condition although not yet in bankruptcy (hereinafter, "borrowers substantially in bankruptcy"), the reserve for possible loan losses is provided at the full amount of the book value of such loans after deducting the amount of direct write-offs (as defined below), and excluding the amounts deemed collectible from sale of the collateral pledged and the guarantees that are deemed recoverable.

For the unsecured and unguaranteed portion of loans to customers not presently in the above circumstances, but with a high probability of becoming so (hereinafter "customers with high probability of becoming insolvent"), the reserve for possible loan losses is provided at the amounts deemed necessary after deduction of the estimated realizable value of collateral and guarantees based on the customer's overall financial condition.

For other loans, the reserve for possible loan losses is provided at an amount based on the anticipated loss rates calculated from the actual losses for a certain period.

Regarding each loan, the Credit Review Office, which is independent of the operating divisions, reviews the operating divisions' evaluation of each loan for collectibility based on self-assessment standards.

For loans to borrowers under bankruptcy proceedings and borrowers substantially in bankruptcy that are secured by collateral and guarantees, the unrecoverable portion of such loans is determined by subtracting the estimated recoverable amounts from the disposal of the collateral and the amounts deemed recoverable from the guarantors. The unrecoverable amount is written off directly against the value of the loan ("direct write-off"). The amounts of such direct write-offs at 31st March, 2014 and 2013 were ¥20,339 million (\$197,619 thousand), and ¥24,666 million, respectively.

For loans to borrowers with a rescheduled or restructuring plan, which exceed a certain amount, the discounted cash flow (DCF) method is applied to provide for doubtful accounts, if cash flows from collection of principal and receipts of interest can be reasonably estimated. Under the DCF method a reserve for possible loan losses is provided at the difference between the cash flows discounted by the original interest rate and the carrying value of the loan.

Consolidated subsidiaries record a general reserve for possible loan losses by applying the historical loan-loss ratio observed over specific periods, and record a specific reserve for certain loans at the estimated uncollectible amount based on assessment of each borrower's ability to repay.

(1) Reserve for Devaluation of Securities

In order to provide for a loss on investments, the Bank estimates the amount deemed necessary based on a review of financial position, etc. of the companies issuing securities or golf club membership.

(m) Reserve for Retirement Benefits for Directors and Corporate Auditors

Reserve for retirement benefits for directors and corporate auditors is provided by some of the consolidated subsidiaries at the amount that would be paid in accordance with the internally established rule at the balance sheet date if they were retired on that date.

(n) Reserve for Reimbursement of Deposits

Reserve for reimbursement of deposits is provided for possible losses on the future claims for withdrawal of the deposits, which was derecognized, at an amount deemed necessary based on the estimates of the Bank.

(o) Reserve for Other Contingent Losses

Reserve for other contingent losses is provided for possible losses on loans under the shared responsibility system with the Credit Guarantee Corporation as well as for possible losses resulting from other contingencies not covered by the other reserves, at an amount deemed necessary based on the estimates of the future possible payments by the Bank.

(p) Reserve under the Special Laws

Reserve under the special laws is a legal reserve for financial instruments exchange, which is provided for possible losses arising from the purchase or sale of securities or other securities-related trading activities by the Bank's consolidated subsidiaries in Japan at an amount estimated pursuant to Article 46, item 5 of the Financial Instruments and Exchange Law as well as Article 175 of the Cabinet Office Ordinance relating to the financial instruments business.

(q) Accounting for Retirement Benefits

The retirement benefit obligation for employees is attributed to each period by the straight-line method over the estimated years of service of the eligible employees.

Actuarial gain/loss is amortized using the straight–line method mainly over a period of 10 years following the year it arises, which is within the average remaining years of service of the current employees.

For some consolidated subsidiaries, liability for retirement benefits and retirement benefit expenses are calculated using the simplified method, which assumes the retirement benefit obligation to be equal to the benefits payable if all eligible employees voluntarily terminated their employment at fiscal year end.

(r) Foreign Currency Translation

Foreign currency-denominated assets and liabilities are translated into Japanese yen primarily at the exchange rate prevailing at the balance sheet date.

(s) Accounting for Leases

Finance lease transactions which were initially engaged by the Bank and its consolidated subsidiaries prior to 1st April, 2008 where there is no transfer of ownership are accounted for by the same method as applicable to ordinary operating lease contracts.

(t) Hedge Accounting

1) Hedge accounting for interest rate risks

The Bank applies the deferred method as hedge accounting for interest rate risks of certain financial assets and liabilities by using the individual hedging, which directly matches hedged items and hedging instruments.

With regard to hedging transactions to offset fluctuations in the fair value of fixed-rate bonds classified as available-for-sale securities, in accordance with operational rules concerning hedge accounting, hedged items are distinguished by identical type of bonds and interest rate swaps are used as hedging instruments. Since significant terms related to those hedged items and hedging instruments are nearly identical, such hedging transactions are deemed highly effective in terms of evaluation of hedge effectiveness.

No evaluation is performed for hedge effectiveness of qualifying interest rate swaps accounted for by the special treatment, as it is ascertained that the criteria for the special treatment are continually met. ② Hedge accounting for foreign exchange rate risk

The Bank applies the deferred method as hedge accounting for foreign exchange risks of various foreign currency-denominated financial assets and liabilities in accordance with the "Accounting and Auditing Treatment for Accounting for Foreign Currency Transactions in Banking Industry" (JICPA Industry Audit Committee Report No. 25).

The Bank treats foreign exchange swap transactions as hedging instruments for the purpose of the hedge of foreign currency-denominated financial assets and liabilities, and the Bank tests hedge effectiveness by matching the foreign currency swap position as hedging instruments with the related foreign currency-denominated financial assets and liabilities as hedged items. (3) Internal contract

For internal contracts, the Bank manages the foreign currency swaps that are designated as hedging instruments in accordance with the strict criteria for external transactions stipulated in the JICPA Industry Audit Committee Report No. 25. Therefore, the Bank either recognizes gains or losses that arise from such currency swaps as earnings or defers them, rather than eliminating them.

	(u) Amortization of Goodwill
	Goodwill is amortized using the straight-line method over five years.
	(v) Cash and Cash Equivalents in the Consolidated Statements of Cash Flows
	Cash and Cash Equivalents in the consolidated statements of cash flows are composed of cash and due
	from central bank.
	(w) Accounting Treatment for Consumption Taxes
	The tax excluded method is used as the accounting treatment for consumption taxes and local
	consumption taxes for the Bank and its domestic consolidated subsidiaries.
Change in Accounting	"Accounting Standard for Retirement Benefits" (ASBJ Statement No. 26 issued on 17th May, 2012, hereinafter
Policies	"Retirement Benefits Accounting Standard") and "Guidance on Accounting Standard for Retirement Benefits"
	(ASBJ Guidance No. 25 issued on 17th May, 2012, hereinafter "Retirement Benefits Guidance") were adopted
	as of the end of the fiscal year ended 31st March, 2014 (with the exception of the main clause of Paragraph 35 of
	the Retirement Benefits Accounting Standard and the main clause of Paragraph 67 of the Retirement Benefits
	Guidance), and accordingly the difference between the retirement benefit obligation and the plan asset was recorded
	as an asset or liability for retirement benefits.
	Concerning the application of the Retirement Benefits Accounting Standard, in accordance with the provisiona
	treatment set forth in Paragraph 37 of the standard, unrecognized actuarial gains (losses) after adjusting tax effects
	were recorded as retirement benefits liability adjustments under accumulated other comprehensive income.
	As a result of this change, ¥7,043 million (\$68,434 thousand) and ¥5,339 million (\$51,876 thousand) were
	recorded in asset and liability for retirement benefits, respectively, as of 31st March, 2014. In addition, deferred
	tax assets and minority interests increased by ¥1,960 million (\$19,044 thousand) and ¥6 million (\$65 thousand),
	respectively, and accumulated other comprehensive income decreased by $\$3,539$ million ( $\$34,394$ thousand).
	The effect of this change on per-share information is disclosed in Note 39.
Accounting Standards	(1) Accounting standards for retirement benefits (issued on 17th May, 2012)
yet to be Applied	(a) Outline
	The accounting standard and guidance have been revised primarily to change the accounting treatment of
	unrecognized actuarial gains and losses, as well as unrecognized prior service costs, and the calculation
	method for the retirement benefit obligation and service costs, and to expand the scope of disclosure items,
	with a view toward improving financial reporting while taking international trends into consideration.
	(b) Effective date
	The Bank plans to apply the change in the calculation method for the retirement benefit obligation and service
	costs effective as of the beginning of the fiscal year ending 31st March, 2015.
	(c) Impact of application of the accounting standard and guidance
	The impact of application of the accounting standard and guidance is immaterial.
	(2) Accounting standards for business combinations (issued on 13th September, 2013)
	(a) Outline
	I he accounting standards and guidance have been revised primarily to change 1) the accounting treatment
	The accounting standards and guidance have been revised primarily to change 1) the accounting treatment for changes in shares that a parent company has in one of its subsidiaries due to acquisition of additional
	for changes in shares that a parent company has in one of its subsidiaries due to acquisition of additional
	for changes in shares that a parent company has in one of its subsidiaries due to acquisition of additional shares of the subsidiary which is under continued control of the parent and 2) the accounting treatment
	for changes in shares that a parent company has in one of its subsidiaries due to acquisition of additional shares of the subsidiary which is under continued control of the parent and 2) the accounting treatment for acquisition-related costs, to define 3) the provisional treatment for these changes, and to amend 4)
	for changes in shares that a parent company has in one of its subsidiaries due to acquisition of additional shares of the subsidiary which is under continued control of the parent and 2) the accounting treatment for acquisition-related costs, to define 3) the provisional treatment for these changes, and to amend 4) the presentation method of net income and the terminology from "minority interests" to "non-controlling

Non-performing loans included in the loans at 31st March, 2014 and 2013 consisted of the following:

 Millions of yen
 Thousands of

 2014
 2013
 2014

	2014	2013	2014
Cash and due from banks	¥2	¥2	\$19
Securities	83,764	111,561	813,875

The following deposits were included in other assets at 31st March, 2014 and 2013:

			Thousands of
	Millions of	f yen	U.S. dollars
	2014	2013	2014
Deposits included in other assets	¥3,376	¥3,221	\$32,808

### 9. Contracts for Commitment

Lines of Credit

Contracts for commitment lines of credit related to overdraft agreements and loan credit facilities represent a promise on a lending bank at a specified credit limit, to a customer upon request for funds, unless there is a violation of the contractual conditions.

The aggregate amounts under commitment contracts not yet drawn down at 31st March, 2014 and 2013 are as follows:

			I housands of
	Millions of yen		U.S. dollars
-	2014	2013	2014
Aggregate amount under commitment contracts not yet			
drawn down	¥1,811,594	¥1,731,366	\$17,601,972
Of the above amount, those with original maturity of less			
than one year or cancellable at any time without penalty	1,781,542	1,710,394	17,309,977

As many of these contracts expire without the right to extend the loans being exercised, the aggregate total of the undrawn amount does not necessarily affect the future cash flows of the Bank and its consolidated subsidiaries. Many of these contracts have stipulations that allow the Bank and its consolidated subsidiaries to turn down a loan request or reduce the amount of the credit line if there is a change in financial conditions, a need to secure their credit, or other similar reasons. In addition to obtaining necessary collateral (real estate, securities, etc.) at the time the contract is entered into, the Bank and its consolidated subsidiaries assess the condition of the customer's business operations, and analyze other information, based on internal procedures and standards. If necessary, the contract is reviewed and revised, or additional steps are taken to secure the credit extended to the customer.

oreign Exchange	Foreign exchange assets and liabilities at 31st March, 20	014 and 2013 consisted of	of the following:

\* An increase for the year ended 31st March, 2013 was caused by purchase of fractional shares, and a decrease was caused by sale of fractional shares.

#### Notes to Consolidated Financial Statements

19. Revaluation of Premises	Based on the Law Concerning Land Revaluation (Law No. 34, promulgated on 31st March, 1998), the Bank
Account	has revalued its land used for business purposes. The deferred taxes on revaluation differences are presented
	in the account, "Deferred tax liabilities on revaluation of premises" in the liabilities of the consolidated
	balance sheet. The amount of revaluation differences, net of tax, is presented as "Revaluation of premises, net
	of taxes" in net assets.

The excess of the aggregate market value of land for business use revalued in accordance with Article 10 of the Law Concerning Land Revaluation over the book value after revaluation at 31st March, 2014 and 2013 is as follows:

¥30,672	¥33,365	\$298,024
2014	2013	2014
Millions	of yen	U.S. dollars
		Thousands of

20. Other Interest Income	Other interest income for the years ended 31st Marc	h, 2014 and 2013 consisted	of the following:

Total	¥6,702	¥4,991	\$65,126

#### 23. Other Interest Expenses

Other interest expenses for the years ended 31st March, 2014 and 2013 consisted of the following:

		Thousands of
Millions of yen		U.S. dollars
2014	2013	2014
¥1,723	¥1,693	\$16,749
95	220	926
217	190	2,113
¥2,036	¥2,104	\$19,789
	2014 ¥1,723 95 217	2014         2013           ¥1,723         ¥1,693           95         220           217         190

24. Other Operating Expenses Other operating expenses for the years ended 31st March, 2014 and 2013 consisted of the following:

			Thousands of
	Millions of yen		U.S. dollars
-	2014	2013	2014
Losses on sale of bonds	¥3,486	¥978	\$33,872
Losses on redemption of bonds	106	212	1,036
Expenses for derivatives other than trading derivatives	9	35	92
Others	0	0	0
Total	¥3,602	¥1,226	\$35,000

.

### 25. General and Administrative General and administrative expenses for the years ended 31st March, 2014 and 2013 consisted of the following:

			Thousands of	
	Millions of yen		U.S. dollars	
-	2014	2013	2014	
Salaries and allowances	¥33,963	¥34,806	\$330,000	
Employee retirement benefits	1,673	3,271	16,264	
Retirement benefits for directors and corporate auditors	31	30	310	
Depreciation	6,156	5,405	59,820	
Rental expenses	4,091	4,702	39,756	
Amortization of goodwill	128	232	1,251	
Taxes	3,999	4,063	38,858	
Others	33,860	29,313	328,999	
Total	¥83,906	¥81,826	\$815,261	

26. Other Expenses

Other expenses for the years ended 31st March, 2014 and 2013 consisted of the following:

			Thousands of	
	Millions of	yen	U.S. dollars	
	2014	2013	2014	
Provision for possible loan losses	¥1,090	¥1,095	\$10,595	
Losses on write-offs of claims	3,490	5,777	33,916	
Losses on sale of stock and other securities	306	801	2,982

	Total other comprehensive income	¥2,745	¥24,640	\$26,672	

#### 28. Lease Transactions

#### (1) Finance leases

Information on finance lease transactions which are accounted for as operating leases at 31st March, 2014 and 2013 is summarized as follows:

			Thousands of
	Millions of	yen	U.S. dollars
	2014	2013	2014
Amounts equivalent to acquisition cost			
Tangible fixed assets	¥4,355	¥4,355	\$42,315
Total	¥4,355	¥4,355	\$42,315
Amounts equivalent to accumulated depreciation			
Tangible fixed assets	¥3,524	¥3,321	\$34,242
Total	¥3,524	¥3,321	\$34,242
Amounts equivalent to carrying value			
Tangible fixed assets	¥830	¥1,033	\$8,072
Total	¥830	¥1,033	\$8,072

Note: The amount equivalent to acquisition cost includes an interest element as the total future finance lease payments are not significant to the balance of tangible fixed assets at the end of the year.

Future lease payments of finance leases which are accounted for as operating leases at 31st March, 2014 and 2013 are as follows:

			Thousands of
	Millions of	U.S. dollars	
	2014	2013	2014
Future finance lease payments			
Due within one year	¥195	¥202	\$1,899
Due after one year	635	830	6,173
Total	¥830	¥1,033	\$8,072

Note: The amount of the future finance lease payments at the end of the year includes an interest element as the total future finance lease payments are not significant to the balance of tangible fixed assets at the end of the year.

Total lease payments during the year and the amount equivalent to depreciation expenses for the years ended 31st March, 2014 and 2013 are as follows:

			Thousands of
	Millions of	fyen	U.S. dollars
	2014	2013	2014
Total lease payments during the year	¥202	¥370	\$1,968
The amount equivalent to depreciation expenses *	202	370	1,968

\* The amount equivalent to depreciation expenses was calculated using the straight-line method with no residual value over the lease term.

#### (2) Operating leases

Future lease payments required under operating leases that are non-cancelable at 31st March, 2014 and 2013 are as follows:

	Millions of yen		Thousands of U.S. dollars
	2014	2013	2014
Future operating lease payments			
Due within one year	¥351	¥386	\$3,411
Due after one year	993	1,302	9,657
Total	¥1,345	¥1,689	\$13,069

29. Financial Instruments	
	(1) Matters related to status of financial instruments
	1. Policies for financial instruments
	The Nishi-Nippon City Bank Group (the "Group") is engaged in the financ

The Nishi-Nippon City Bank Group (the "Group") is engaged in the financial service business, with a primary focus on banking businesses such as deposits, loans, securities, and domestic and foreign currency exchange businesses. The Group manages and raises funds, taking into account market conditions and balancing duration. To conduct these businesses, the Bank comprehends the risks arising from all of its assets and liabilities, including off-balance-sheet transactions, through the proper controls over these risks, and builds reasonable and effective portfolios. Thus the Bank operates a comprehensive asset and liability management (ALM) system with the aim of maximizing and stabilizing its profits.

In addition, some of the Bank's consolidated subsidiaries are engaged in banking, credit card, credit guarantee services, credit management, restructuring support services, claims servicing businesses and financial instruments and exchange services.

2. Types of financial instruments and related risks

Loans, which comprise 70% of the Group's total assets, are primarily made to domestic corporations and individuals and are exposed to credit risks resulting from non-performance of contracts. Should the creditworthiness of major borrowers deteriorate, the value of collateral sharply decline, or other unanticipated problems arise, it could cause an increase in the cost of credit such as an unexpected write-off or rise in reserve for possible loan losses. Moreover, considering the relative weight of the invested assets, the impact of any such problems could be substantial and could have a negative effect on the financial position and performance of the Group.

Securities are mainly stocks, debt securities, and investment trusts and are exposed to the credit risk of each issuer and the risk of interest rate fluctuation. Stocks that are marketable are exposed to price volatility risks that a decline in their market prices cause impairment losses and valuation losses on the stocks. Debt securities are also subject to price volatility risks that an increase in the market interest rates following economic recovery may cause valuation losses on the securities.

Borrowed money and bonds are exposed to liquidity risks that, if some problems arise in cash management due to deterioration in financial positions at the Group, the Group is forced to raise funds at higher interest rates than usual, market transactions are suspended as a result of market turmoil, or it is forced to make transactions at a drastically unfavorable price than usual, it could impact future operations of the Group.

Derivative transactions include interest rate swaps, forward exchange transactions, currency swaps, and currency options. These derivatives are utilized primarily as hedging instruments to manage and mitigate the market risks of on-balance-sheet assets and liabilities. In addition, some of the derivative transactions in trading operations are used for the purpose of making profits through short-term fluctuations in the market rates, arbitrage transactions and others. Hedge transactions consist mainly of interest rate swaps as a hedge against interest rate fluctuation risks arising from loans with fixed interest rates and callable time deposits, and forward exchange transactions and currency options as a hedge against exchange rate fluctuation risks arising from foreign currency-denominated assets and liabilities. The Bank assesses the hedge effectiveness based on the difference between accumulated changes in cash flows of hedged items and hedging instruments. However, no evaluation is performed for the hedge effectiveness of qualifying interest rate swaps accounted for by the special treatment under the Accounting Standard for Financial Instruments, as it is ascertained that such derivatives continually meet the criteria for special treatment. Risks related to these derivatives transactions include the market risk of a potential loss in the fair value of financial instruments or portfolios resulting from fluctuations in interest rates, foreign exchange rates, stock prices and other factors as well as the credit risk of a potential loss in the value of a transaction due to default by counterparties to the contracts.

#### 3. Risk management system for financial instruments

① Credit risk management

Recognizing the credit risk as our highest priority, the Group is working on strengthening controls over the credit risk in accordance with the Group's credit risk management policy and credit policy.

The Group applies its strict standards to the screening of individual credit extension, and credits that exceed certain thresholds are reviewed further by specialized staff in its Credit Supervision Division. In this way, the Group is working to maintain the soundness of its assets.

Regarding its loan portfolios, the Group tries to diversify risks to ensure that there is no concentration on any particular industrial sectors or customers, through its systems of credit risk quantification and portfolio management by sector based on the credit rating system.

In addition, each related division carries out self-assessment of its assets for calculating the appropriate level of write-offs and provisions. The asset audit office in the Internal Audit Division of the Bank constantly monitors the status of the self-assessment procedures and adequacy of the write-offs and provisions.

2 Market risk management

The Group clearly separates the department responsible for conducting market transactions (front office) from the department responsible for business administration (back office). Furthermore, the Corporate Risk Management & Compliance Division of the Bank, which is independent from the market divisions, has been put in charge of risk management (middle office) to monitor conditions of the market transactions and their compliance with the market risk-related regulations. The Group thus has a system of mutual controls among offices.

In addition, the Group is working to achieve stable profits by improving its management methods through a variety of techniques for measuring risks such as VaR (Value at Risk) and BPV(Basis Point Value) methods, and by establishing a maximum acceptable level for market risks and controlling the risks within the certain acceptable range.

(Quantitative information on market risks)

The measured quantity of market risks of the Group as a whole at 31st March, 2014 and 2013 were  $\pm$ 45,024 million (\$437,465 thousand) and  $\pm$ 40,144 million, respectively.

The Bank's financial instruments which are subject to the measurement include loans, deposits, securities and derivatives. The Bank measures market risks using historical VaR method with an observation period of five years, a confidence interval of 99% and a holding period of 6 months. The quantity of market risks of the Bank at 31st March, 2014 and 2013 were ¥43,684 million (\$424,446 thousand) and ¥38,915 million, respectively.

The Bank performs backtesting, which compares VaR calculated by the model with actual performance (gain or loss). Based on the results of the testing, we believe that the risk measurement model which we use captures market risks with sufficient accuracy. However, since VaR measures market risks at a certain probability which is statistically calculated, it is not always possible for the model to capture market risks in situations where market conditions change drastically. ③ Liquidity risk management

The Group recognizes the liquidity risk as one of the most significant risks, because there are concerns over potential business failures and systemic risks when the liquidity risk rises. The Group provides against the liquidity risks by ensuring an adequate reserve for outstanding claims and developing a contingency plan that assumes various scenarios.

As for the day-to-day cash management of the Bank, a system of mutual controls among divisions has been put into place. As a part of this system, the Treasury & Securities Transaction Division and Treasury & Portfolio Investment Division, which are responsible for the Bank's day-to-day cash management, raise and manage marketable funds, while the Corporate Risk Management & Compliance Division, which is responsible for managing the liquidity risk, monitors the Bank's cash position. In this way, the Bank maintains a fluid and stable cash position.

④ Risk management for derivative transactions

The Bank's derivative transactions are entered into using operational rules prepared in accordance with the Bank's internal regulations. The rules stipulate the scope of derivative usage, authorization, responsibility, procedure, credit line, loss-cut rule, and reporting system. Each business line is responsible for each relevant risk management and for reporting to management, including the ALM Committee, on a monthly basis.

4. Supplementary explanation of the estimated fair value of financial instruments The fair value of financial instruments includes the value based on the market price as well as a reasonably estimated value in case there is no market price. Because various assumptions are used in the estimation of the fair value, the fair value may vary when different assumptions are used.

#### (2) Estimated fair value of financial instruments

Carrying value of financial instruments in the consolidated balance sheets at 31st March, 2014 and 2013 and their fair values and valuation differences are as follows. Non-listed stocks and others whose fair value is extremely difficult to be estimated are excluded from the table below (refer to Note 2).

#### <At 31st March, 2014>

	Millions of yen			
			Valuation

\*\* Derivative transactions recorded in Other assets and Other liabilities are presented in total. The value of assets and liabilities arising from derivative transactions is shown at net value.

#### (Note 1) Methods for estimating the market value of financial instruments

#### Assets:

(1) Cash and due from banks

Because the fair value of due from banks that does not have stated maturity approximates its carrying value, the carrying value is treated as the fair value. The fair value of due from banks that has stated maturity is based on the present value of the totals by maturity bucket discounted by the interest rate that would be applied if similar deposits were placed. As the fair value of due from banks with a short-term original contractual maturity (one year or less) approximates its carrying value, its carrying value is treated as the fair value.

(2) Securities

The fair value of stocks is based on their market price on the stock exchange, while the fair value of debt securities is based on the Reference Prices (Yields) for OTC Bond Transactions published by the Japan Securities Dealers Association, the price quoted by the correspondent financial institutions or the value reasonably calculated by the banks. The fair value of investment trusts is based on the announced reference price or the price quoted by the correspondent financial institutions. The fair value of foreign securities is based on the price quoted by the correspondent financial institutions or the financial information vendors.

The fair value of private placement bonds with the Bank's own guarantee is based on the present value of future cash flows discounted by the market interest rate adjusted for credit risk.

Floating-rate Japanese government bonds (JGBs) are valued and stated at the amounts reasonably estimated by the Bank as of 31st March, 2013. As a result, securities and net unrealized gains on securities available for sale increased by ¥660 million and ¥426 million, respectively, and deferred tax assets decreased by ¥233 millions of 31st March, 2013, compared with the corresponding amounts if the fair value of the bonds were stated at the market price.

The reasonably estimated fair value of floating-rate JGBs is based on future cash flows derived from JGB yield and volatilities of the underlying assets of 10-year interest rate swaptions, discounted by the respective JGB yield.

Floating-rate JGBs are valued and stated at the market prices as of 31st March, 2014.

Notes concerning securities by each carrying purpose are presented in "30. Securities" of "Notes to Consolidated Financial Statements."

#### (3) Loans and bills discount

Because loans and bills discounted with floating interest rates reflect market interest rates in a short period of time, the fair value of such loans approximates their carrying value as long as the credit standing of the borrower has not changed significantly since origination. Thus, the carrying value of such loans is treated as the fair value. The fair value of loans and bills discounted with fixed interest rates is based on the present value of the total amount of principal and interest categorized by the type of loans, internal rating and term, discounted by the market interest rate adjusted for credit risk. Because the fair value of loans with a short-term contractual maturity (one year or less) approximates their carrying value, the carrying value is treated as the fair value.

Regarding loans to borrowers under bankruptcy proceedings, borrowers substantially in bankruptcy and customers with high probability of becoming insolvent, since the fair value of such loans approximates their carrying value after deducting the reserve for possible loan losses, which is calculated based on the present value of estimated future cash flows or the estimated amounts collectible from the sale of collateral and guarantees, the carrying value is treated as the fair value.

With respect to loans and bills discounted that have no due date because of special attributes such as limiting the borrowings to the amounts secured by collateral, because it is assumed that the fair value approximates the carrying value from the estimated repayment period and interest rate conditions, the carrying value is treated as the fair value.

#### Liabilities:

#### (1) Deposits

For demand deposits, the amount which would be paid if its repayment were demanded on the consolidated balance sheet date (carrying value) is deemed to be the fair value. The fair value of time deposits is based on the discounted present value of the future cash flows categorized by term. The discount rate is the interest rate that would be applied when new deposits were taken. Because the fair value of those with a short-term original contractual maturity (one year or less) approximates their carrying value, the carrying value is treated as the fair value.

(2) Call money and bills sold

Since call money and bills sold have short-term original contractual maturity (one year or less) and their fair value approximates the carrying value, the carrying value is treated as the fair value.

(3) Borrowed money

Because borrowed money with floating interest rates reflects market interest rates in a short period of time and the credit standing of the Bank and its consolidated subsidiaries has not changed significantly since the borrowing, the fair value of such borrowed money is deemed to approximate the carrying value. Therefore, the carrying value is treated as the fair value. The fair value of borrowed money with fixed interest rates is based on the present value of the total amount of principal and interest of the borrowed money categorized by term, discounted by the market interest rate adjusted for credit risk. Because the fair value of borrowed money with a short-term original contractual maturity (one year or less) approximates its carrying value, the carrying value is treated as the fair value.

(4) Bonds

The fair value of bonds is based on the Reference Price (Yields) for OTC Bond Transactions published by the Japan Securities Dealers Association or the price quoted by the securities company. Since bonds with floating interest rates reflect market interest rates in a short period of time and the credit standing of the issuers has not changed significantly since the issuance, the fair value of such bonds is deemed to approximate their carrying value. Thus, the carrying value is treated as the fair value.

#### Derivative transactions:

Derivative transactions are presented in "32. Derivatives" of "Notes to Consolidated Finance Statements."

(Note 2) Financial instruments whose fair value is extremely difficult to be estimated are as stated below. They are not included in "Assets: (2) Available-for-sale securities" presented in "Estimated fair value of financial instruments."

		I nousands of
Millions of	Millions of yen	
2014	2013	2014
¥15,024	¥15,914	\$145,977
2,120	2,147	20,603
¥17,144	¥18,062	\$166,581
	2014 ¥15,024 2,120	2014         2013           ¥15,024         ¥15,914           2,120         2,147

Notes: 1. Because non-listed stocks have no market price and because it is extremely difficult to estimate their fair value, they are not subject to the fair value disclosure.

In the year ended 31st March, 2014 and 2013, impairment losses of ¥117 million (\$1,147 thousand) and ¥109 million were recorded for non-listed stocks, respectively.
 Investments in partnerships whose fair value is extremely difficult to be estimated

because the partnership's assets are non-listed stocks, etc. are not subject to the fair value disclosure.

(Note 3) Repayment schedules for monetary claims and securities with stated maturity at 31st March, 2014 and 2013

#### (5) Devaluation of securities

Securities other than trading securities (excluding securities whose fair value is extremely difficult to be estimated) are devalued to the fair value, and the difference between the acquisition cost and the fair value is treated as the loss for the fiscal year ("devaluation"), if the fair value (primarily the closing market price at the consolidated balance sheet date) has significantly deteriorated compared with the acquisition cost (including amortized cost) unless it is deemed that there is a possibility of a recovery in the fair value. The amounts of devaluation were ¥642 million\* (\$6,245 thousand) and ¥4,416 million\*\* for the years ended 31st March, 2014 and 2013, respectively.

\* stocks ······ ¥642 million (\$6,245 thousand)

#### \*\* stocks ······ ¥4,416 million

The criteria for determining whether the fair value of a security has "significantly deteriorated" are outlined as follows:

- 1. The fair value is 50% or less of the acquisition cost, or
- 2. The fair value exceeds 50% but is 70% or less of the acquisition cost and the quoted market price maintains a certain level or lower.

#### (6) Unrealized gains/losses on securities available for sale

The components of the unrealized gains/losses on securities available for sale at 31st March, 2014 and 2013 are as follows:

#### <At 31st March, 2014>

#### Notes to Consolidated Financial Statements

#### (2) Derivative transactions to which hedge accounting is applied

Summarized below are the contract value or the notional principal and the fair value of the derivative transactions at 31st March, 2014 and 2013, to which hedge accounting is applied. The amounts of the contract value are not necessarily indicative of the actual market risk of derivative transactions.

### 1. Interest related transactions <At 31st March, 2014>

				Millions of yen	
Hedge accounting			Contract	value	
method	Type of transactions	Hedged item	Total	Over one year	Fair value
Principle hedge	Interest rate swaps:	Available-for-			
accounting	Receive-floating and pay-fixed	sale securities	¥5,146	¥5,146	(¥55)
method					
Special treatment	Interest rate swaps:	Loans and bills			
for interest rate	Receive-fixed and pay-floating	discounted,	3,400	3,100	
swaps	Receive-floating and pay-fixed	and deposits	283,856	226,856	(Note 2)
	Interest rate options		15,000	15,000

in Banking Industry" (JICPA Industry Audit Committee Report No. 25).

2. Calculation of fair value is based on the discounted cash flows and others.

#### 33. Employee Retirement Benefits

#### <For the year ended 31st March, 2014>

(1) Description of the retirement benefit plan

The Bank and its domestic consolidated subsidiaries adopt funded or unfunded defined benefit plans and/or the defined contribution plan to provide for employee retirement benefits.

Under the defined benefit corporate pension plans (all funded), lump-sum or annuity payments are made at the amounts based on salaries and the length of service periods of the covered employees. The Bank has established a retirement benefit trust for its defined benefit corporate pension plan.

Under the lump-sum payment plans (principally unfunded, however, some plans have a funded status as a result of the establishment of a retirement benefit trust), retirement benefits are paid in the form of a lump sum at the amounts based on salaries and the length of service periods of the covered employees.

The Bank may also pay additional retirement benefits that are not subject to actuarial calculation.

As of 31st March, 2014, the lump-sum payment plans have been adopted by 6 group companies including the Bank and its domestic consolidated subsidiaries. The corporate pension fund plans have been adopted by the Bank and 1 consolidated subsidiary. The defined contribution plan has been adopted by 1 consolidated subsidiary.

For the lump-sum payment plans that certain consolidated subsidiaries have adopted, liability for retirement benefits and retirement benefit expenses are calculated using the simplified method which assumes the retirement benefit obligation to be equal to the benefits payable if all the eligible employees voluntarily terminated their employment at fiscal year end.

#### (2) Defined benefit plans

(a) Reconciliation between the balances of retirement benefit obligation at the beginning and end of the year Thousands of

		Thousands of
	Millions of yen	U.S. dollars
Retirement benefit obligation at beginning of the year	¥64,432	\$626,047
Service cost	2,049	19,916
Interest cost	1,043	10,141
Actuarial loss	106	1,033
Retirement benefits paid	(3,283)	(31,906)
Others	_	-
Retirement benefit obligation at end of the year	¥64,348	\$625,233

(b) Reconciliation between the balances of plan assets at the beginning and end of the year

		Thousands of
	Millions of yen	U.S. dollars
Plan assets at beginning of the year	¥62,248	\$604,821
Expected return on plan assets	2,048	19,899
Actuarial gain	359	3,492
Contributions by employer	2,981	28,972
Contributions by employees	165	1,608
Retirement benefits paid	(1,749)	(17,003)
Others	_	-
Plan assets at end of the year	¥66,053	\$641,791

(c) Reconciliation between the balances of retirement benefit obligation and plan assets at the end of the year and the amounts of the liability and asset for retirement benefits recognized in the consolidated balance sheet Thousands of

	Millions of yen	U.S. dollars
Retirement benefit obligation (funded)	¥64,002	\$621,864
Fair value of plan assets	(66,053)	(641,791)
	(2,050)	(19,926)
Retirement benefit obligation (unfunded)	346	3,368
Net asset for retirement benefits in the balance sheet	(¥1,704)	(\$16,558)

		Thousands of
	Millions of yen	U.S. dollars
Liability for retirement benefits	¥5,339	\$51,876
Asset for retirement benefits	(7,043)	(68,434)
Net asset for retirement benefits in the balance sheet	(¥1,704)	(\$16,558)

(d) Components of retirement benefit expenses

		Thousands of
	Millions of yen	U.S. dollars
Service cost	¥1,884	\$18,312
Interest cost	1,043	10,141
Expected return on plan assets	(2,048)	(19,899)
Amortization of unrecognized actuarial loss	304	2,961
Others	487	4,735
Retirement benefit expenses	¥1,672	\$16,252

Notes: 1. Contributions by employees to corporate pension funds, etc. have been deducted from the service cost.

2. Retirement benefit expenses of consolidated subsidiaries that have adopted the simplified method are reported in total under "Service cost."

(e) Items recorded in retirement benefits liability adjustments (gross of income tax effects) are as follows:

		Thousands of
	Millions of yen	U.S. dollars
Unrecognized actuarial loss	¥5,493	\$53,373

#### (f) Matters concerning plan assets

1) Percentages of each main category of the total plan assets are as follows.		
Bonds	24%	
Stocks	60	
Cash and deposits	1	
Others	15	
Total	100%	

\* Retirement benefit trusts established for the corporate pension plans and for the lump-sum payment plans account for 30% and 21% of the total plan assets, respectively.

2) The expected long-term rate of return on plan assets has been estimated by taking into account the current and expected allocation of the plan assets and the current and anticipated long-term rate of return on diverse assets that constitute the plan assets.

1.623% (principally)

(g) Assumptions for actuarial calculation

Major assumptions for actuarial calculation as of 31st March, 2014

1) Discount rates:

- 2) Expected long-term rate of return on plan assets: 3.3% (principally)
- (3) Defined contribution plans

Contributions of ¥0 million (\$1 thousand) have been made to the defined contribution plan by the consolidated subsidiary for the year ended 31st March, 2014.

<For the year ended 31st March, 2013>

(1) Description of the retirement benefit plan

The Bank and its domestic consolidated subsidiaries adopt defined benefit plans such as corporate pension fund plans and lump-sum payment plans, and the defined contribution plan. The Bank may also pay additional retirement benefits which are not subject to actuarial calculation.

The Bank has established a retirement benefit trust.

As of 31st March, 2013, the lump-sum payment plans are adopted by 8 group companies including the Bank and its domestic consolidated subsidiaries. The corporate pension fund plans are adopted by the Bank and 1 consolidated subsidiary. The defined contribution plan is adopted by 1 consolidated subsidiary.

(2) The funded status and amounts recognized in the consolidated balance sheet at 31st March, 2013

	Millions of yen
Projected benefit obligation	(¥64,432)
Plan assets	62,248
Projected benefit obligation in excess of	
plan assets	(2,184)
Unrecognized actuarial loss	6,051
Unrecognized prior service cost	-
Net asset (liability) recognized	3,866
Prepaid pension cost	10,593
Reserve for employee retirement benefits	(¥6,726)

(3) Pension cost for the year ended 31st March, 2013

	Millions of yen
Service cost	¥1,674
Interest cost	1,397
Expected return on plan assets for the year	(1,555)
Amortization of unrecognized prior service cost	_
Amortization of unrecognized actuarial loss	1,295
Others (additional retirement benefit payments)	417
Net pension benefit expense	¥3,228

#### Notes to Consolidated Financial Statements

Suaght-line method
10 years(principally)*

\* Using the straight-line method from the following fiscal year over a 10-year period within the average remaining years of service of employees.

34. Income Taxes

The tax effect of temporary differences and tax loss carryforwards that give rise to the deferred tax assets and liabilities at 31st March, 2014 and 2013 are as follows:

			Thousands of	
	Millions of	yen	U.S. dollars	
—	2014	2013	2014	
Deferred tax assets:				
Reserve for possible loan losses	¥18,162	¥19,302	\$176,473	
Reserve for retirement benefits	_	3,635	_	
Liability for retirement benefits	4,484	_	43,567	
Accumulated depreciation	2,077	2,089	20,186	
Loss carryforwards for tax purposes	10,932	19,450	106,227	
Others	10,744	12,323	104,395	
Sub-total	46,401	56,800	450,850	
Valuation allowance	(17,711)	(18,436)	(172,090)	
Total deferred tax assets	28,690	38,364	278,760	
Deferred tax liabilities:				
Reserve fund for deferred income of				
fixed assets	(1)	(1)	(18)	
Unrealized losses on securities attributable to				
partition of corporation, net	(59)	(61)	(573)	
Asset retirement obligations	(52)	(56)	(509)	
Deferred gains on hedging instruments, net	_	(0)	_	
Unrealized gains on securities available for sale, net	(20,095)	(18,785)	(195,256)	
Total deferred tax liabilities	(20,209)	(18,905)	(196,357)	
Vet deferred tax assets	¥8,480	¥19,459	\$82,403	

The effective tax rate reflected in the consolidated statement of income for the year ended 31st March, 2013 differs from the statutory tax rate for the following reasons:

	2013
Statutory tax rate	37.8%
Adjustments:	
Expenses permanently nondeductible for income tax purposes	0.5
Dividend income deductible for income tax purposes	(1.8)
Inhabitant's per capita taxes	0.3
Increase in valuation allowance	2.4
Others, net	1.0
Effective tax rate	40.2%

The reconciliation is omitted for the year ended 31st March, 2014, as the difference between the statutory tax rate and the effective tax rate reflected in the consolidated statement of income was 5/100 or less of the statutory tax rate.

[Disclosure for the year ended 31st March, 2014]

Following the promulgation of the "Act for Partial Amendment of the Income Tax Act, etc." (Act No. 10, 2014) on 31st March, 2014, the Special Corporation Tax for Reconstruction has been abolished from the year beginning on or after 1st April, 2014. As a result, the statutory tax rate used to calculate deferred tax assets and liabilities associated with the temporary differences, etc. that are expected to reverse during the year beginning 1st April, 2014 has been changed from 37.8% to 35.4%. With this change, deferred tax assets and net deferred losses on hedging instruments, net of taxes, decreased by ¥977 million (\$9,493 thousand) and ¥1 million (\$12 thousand) , respectively, whereas earned surplus and deferred income taxes increased by ¥0 million (\$0 thousand) and ¥975 million (\$9,480 thousand), respectively, as of and for the year ended 31st March, 2014.

#### 35. Asset retirement obligations Information on asset retirement obligations is as follows:

#### Asset retirement obligations that are recorded in the consolidated balance sheets

(1) Outline of asset retirement obligations

The Bank and its consolidated subsidiaries recognize asset retirement obligations for restoration obligations resulting from real estate lease agreements such as those of the Group branch offices and commercial fixed-term leasehold agreements. The Bank and its consolidated subsidiaries also recognize asset retirement obligations pertaining to obligations to remove hazardous substances used in some of their branch offices in accordance with the Ordinance on Prevention of Health Impairment due to Asbestos.

#### (2) Method for calculating the value of asset retirement obligations

An asset retirement obligation is calculated by first estimating the period of expected use of the asset, which is the relevant building's depreciation period (principally 39 years), and then discounting the value of the relevant liability using the government bond's market rate (principally 2.304%) that matches said depreciation period as the discount rate.

(3) Changes in total asset retirement obligations for the years ended 31st March, 2014 and 2013

			Thousands of
	Millions of yen		U.S. dollars
-	2014	2013	2014
Balance at beginning of the year	¥825	¥874	\$8,025
Increase due to acquisition of tangible fixed assets	6	5	67
Adjustment for passage of time	15	15	148
Decrease due to fulfillment of asset retirement	15	68	145
obligation			
Balance at end of the year	¥833	¥825	\$8,095

#### Notes to Consolidated Financial Statements

36.	Business Segment
	Information

### Segment Information (1) Segment information summary

Financial information can be individually obtained for each of the Group's reportable segments. This information is regularly reviewed by the board of directors in order to determine how to allocate business resources and to evaluate business performance.

The Group consists of the Bank, 7 consolidated subsidiaries and 1 affiliate. The Group is engaged in the financial services business, with a primary focus on the banking business.

Thus, while the Group is composed of business segments offering different financial services, the Group's reportable segment is the "banking business" which the Bank and The Bank of Nagasaki are engaged in.

The "banking business" is a wide range of services including services for deposits, loans, securities investment, domestic and foreign currency exchange, and other incidental services.

(2) Method for calculating the amount of ordinary income, profit or loss, assets, liabilities and other items The accounting policies of reported business segments are the same as those described in "2. Summary of Significant Accounting Policies". The segment income is reported on an ordinary income basis. In addition, internal ordinary income among segments is based on the same transaction terms as used in ordinary transactions with third parties.

(3) Ordinary income, profit or loss, assets, liabilities and other items by reportable segments

		Million	is of yen

## Notes to Non-Consolidated Financial Statements (Unaudited)

The Nishi-Nippon City Bank, Ltd.		Vears ended 31st March, 2014 and 2013
1.	. Basis of Presentation of The accompanying non-consolidated financial statements of The Nishi-Nippon City Bank, Ltd. (the Bank)	
	<b>Financial Statements</b>	have been prepared from the accounts maintained by the Bank in accordance with the provisions set forth in
		the Japanese Corporation Law, the Banking Law, and accounting principles generally accepted in Japan,
		which are different in certain respects as to the application and disclosure requirements of International
		Financial Reporting Standard.
2.	Other Accounting Princip	les Accounting principles employed by the Bank in preparing the accompanying non-consolidated financial
	and Practices Employed b	y statements which have significant effects thereon, are explained in Note 2 of the Notes to Consolidated

Financial Statements.

the Bank

#### Independent Auditor's Report

The Board of Directors The Nishi-Nippon City Bank, Ltd.

We have audited the accompanying consolidated financial statements of The Nishi-Nippon City Bank, Ltd. and its consolidated subsidiaries, which comprise the consolidated balance sheet as at March 31, 2014, and the consolidated statements of income, comprehensive income, changes in net assets, and cash flows for the year then ended and a summary of significant accounting policies and other explanatory information, all expressed in Japanese yen.

#### Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in Japan, and for designing and operating such internal control as management determines is necessary to enable the preparation and fair presentation of the consolidated financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in Japan. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. The purpose of an audit of the consolidated financial statements is not to express an opinion on the effectiveness of the entity's internal control, but in making these risk assessments the auditor considers internal controls relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of The Nishi-Nippon City Bank, Ltd. and its consolidated subsidiaries as at March 31, 2014, and their consolidated financial performance and cash flows for the year then ended in conformity with accounting principles generally accepted in Japan.

#### Convenience Translation

We have reviewed the translation of these consolidated financial statements into U.S. dollars, presented for the convenience of readers, and, in our opinion, the accompanying consolidated financial statements have been properly translated on the basis described in Note 1.
